DETAILED ACTION

Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with David Rodack on 6/20/2007.

The application has been amended as follows:

Claim 1, Line 9, "logic to the subscriber" is replaced by "logic to authorize the subscriber".

Allowable Subject Matter

Claims 1-12, 14-19, 33-36, 44 and 48-55 allowed.

The following is an examiner's statement of reasons for allowance:

The prior art of record fails to anticipate or rendered obvious the combined elements/steps including, "logic to authorize the subscriber to access a second communications path, responsive to the first communications path authorization, by comparing a unique identifier of the data communication device that is received from the data communication device with at least one database comprising the authorized unique identifiers for each of the plurality of data communication devices" in conjunction with the remaining limitations as recited in the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

In regards to the independent claims, the examiner further notes that the claim limitations, "**responsive to the first communication path authorization**" requires that the first set of logic to authorize the subscriber to access the first communications path occurs before the logic to authorize the subscriber to access a second communications path. Further, the first set of logic to authorize the subscriber to access the first communications path requires subscriber authentication information, while the logic to authorize a subscriber to access the second communications path requires a unique identifier of the data communications device. Goode only discloses authorizing a user to a first path upon receipt of a TID (the unique identifier of a data communications device) and the second path (non-default service), responsive to authorization of the first communications path, using a PIN (subscriber authentication information).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jason P. Salce whose telephone number is (571) 272-7301. The examiner can normally be reached on M-F 9am-6pm.
